

TAIL GUNNER / CABOOSE

Next to the Leader this is the 2nd most IMPORTANT POSITION!

- 1) Be a part of the planning if possible. Coordinate with the leader on where any bottle necks may happen.
- 2) Keep the leader informed as to the traffic that may be approaching the Caravan. Also, let the leader know when you have pulled the requested block. Let the leader know what the last vehicle was that passed you just before the block. If the messages coming from the leader are unclear or garbled have an assistant pre-designed, keep you posted on what is being sent back or requested by the leader.

ASSISTANT(S)

- 1) Know the route and be ready to relay information back and forth between the leader and the rear of the caravan.

CARAVAN PARTICIPANT(S)

- 2) Know what the route is, either by a trip ticket or sheet of directions, and most importantly, do not chatter on the radio. Of you want to talk to a friend in another Vette use your second radio and a different channel. But keep an EAR OUT for any change the leader may send along on the Radio Caravan Channel. Sit back and enjoy!
